### MAXIMUM TRACTION

Outfitted with Traxx, TRX-4 transforms into an all-terrain monster. The enormous contact patch and grippy treads shrug off the deepest mud and float across sand. Traxx increases ground clearance and approach angles to let you straddle even larger obstacles and climb steeper grades without breaking a sweat.

### LED LIGHT KIT

The pre-installed LED light kit features headlights, taillights, and a wide 28-LED rack-mounted light bar. Fully waterproof for all-weather adventure, the LED light kit keeps the fun going long after the sun sets. The injection moulded grill and tailgate feature integrated lenses for additional scale detail and rugged functionality.

### SCALE ACCESSORIES

TRX-4 with Traxx includes an entire complement of scale accessories. Along with a tough and functional Expedition Rack, the truck comes outfitted with a replica snorkel, side mirrors, traction boards, fire extinguisher, jack, and canisters for extreme scale detail. Inner fenders give TRX-4 a realistic appearance for maximum impact.

- Clipless body mounting
- Heavy-duty steel frame rails
- Adjustable wheelbase
- Dual-fit battery tray
