

JP Epoxy Glue Stand

Thank you for purchasing the JP Epoxy Glue Stand. This useful desk tidy will keep your twin tube epoxy glue conveniently stored in one place, nozzle down and ready for use. Assembly is quick and easy, indeed the parts have been cut to ensure that their location cannot be misinterpreted.

Parts

In the bag you will find:

- 1x Fascia plate (labelled Epoxy Stand).
- 1x Backplate (with pre-cut nozzle holes).
- 1x Baseplate (unmarked).
- 2x Side plates (unmarked).

Note that the laser etched typography on this product may vary from that depicted.

Assembly

1. Using very fine sandpaper, gently remove the light brown scorch marks left by the laser cutting process.
2. Use the photo above for reference and assemble the unit dry to gauge the correct location of the parts.
3. Reassemble using white glue and remove any excess adhesive that seeps from the joints.
4. Use masking tape to hold the parts in position until the glue has set.
5. For a lasting finish apply Guild Materials Gloss Fuel Proofer, ref: GLDCEX1350125.

We hope you enjoy many years of service from this glue stand and are encouraged to try other useful products in the JP laser cut range. Visit www.jperkins.com
